

The publication of science involves reliable, systematic and comprehensive processes by publishers and editors which need to be dealt with proficiently and competently. To maintain high ethical standards of publication of quality science the publisher strives to work closely at all times with journal editors, authors and peer-reviewers. The ethics statement for *IJIP* journal is based on those by the Committee on Publication Ethics (COPE) Code of Conduct guidelines available at

[www.publicationethics.org](http://www.publicationethics.org)

The essentials of IJIP's publishing ethics for all groups involved in the publishing process are as follows:

### **EDITORS' RESPONSIBILITIES**

- The editor of a journal holds a vital position taking important editorial decisions on all peer-reviewed submitted for publication.
- The editor should maintain the transparency of the academic research & record, preclude professional needs from cooperating ethical standards, and always be willing to publish retractions, rectifications, and erratum when required.
- The editor should assess manuscripts for their scientific quality and intellectual content, free from any sort of biased decisions based on discrimination of race, gender, geographical origin, or religion of the author(s). The editor should evaluate manuscripts objectively based on their academic merit free of any commercial or self-interests.
- The editor should not disclose any information on submitted manuscripts before publication of the manuscript.
- Promoting research rectitude must be preserved. If at any stage the publisher suspects any kind of misconduct in research, it should be investigated promptly in detail with suitable authority; and if any suspicious act of misconduct is observed in the peer review, it should be resolved with diligence.

### **REVIEWERS' RESPONSIBILITIES**

- Providing a detailed, constructive, and unbiased evaluation in a timely manner on the scientific content of the work.
- Indicating whether the writing is relevant, concise & clear and evaluating the originality and scientific accuracy.
- Maintaining the confidentiality of the complete review process.
- Notifying the journal editor about any financial or personal conflict of interest and declining to review the manuscript when a possibility of such a conflict exists.
- Notifying the journal editor of any ethical concerns in their evaluation of submitted manuscripts; such as any violation of ethical treatment of animal or human subjects or any considerable similarity between the previously published article and any reviewed manuscript.

### **AUTHORS' RESPONSIBILITIES**

- All the work reported in the manuscript must be original and free from any kind of plagiarism.
- The work should not have been published elsewhere or submitted to any other journal(s) at the same time.
- Any potential conflict of interest must be clearly acknowledged.
- Proper acknowledgements to other work reported (individual/company/institution) must be given. Permission must be obtained from any content used from other sources.
- Only those who have made any substantial contribution to the interpretation or composition of the submitted work, should be listed as 'Authors'. While other contributors should be mentioned as 'co-authors'.

### **Author contributions statements**

Authors are required to include a statement of responsibility in the manuscript that specifies the

contribution of every author. The level of detail varies; some disciplines produce manuscripts that comprise discrete efforts readily articulated in detail, whereas other fields operate as group efforts at all stages.

### **Corresponding author - pre-publication responsibilities**

The corresponding author is solely responsible for communicating with the journal and with managing communication between coauthors. Before submission, the corresponding author ensures that all authors are included in the author list, its order has been agreed by all authors, and that all authors are aware that the paper was submitted.

At submission, the corresponding author must include written permission from the authors of the work concerned for mention of any unpublished material included in the manuscript, for example others' data, in press manuscripts, personal communications or work in preparation. The corresponding author also must clearly identify at submission any material within the manuscript that has previously been published elsewhere by other authors (for example, figures) and provide written permission from those authors and/or publishers, as appropriate, for the re-use of such material.

After acceptance, the proof is sent to the corresponding author, who circulates it to all coauthors and deals with the journal on their behalf; the journal will not necessarily correct errors after publication if they result from errors that were present on a proof that was not shown to coauthors before publication. The corresponding author is responsible for the accuracy of all content in the proof, in particular that names of coauthors are present and correctly spelled, and that addresses and affiliations are current.

### **Corresponding author - responsibilities after publication**

IJIP journal regards the corresponding author as the point of contact for queries about the published paper. It is this author's responsibility to inform all coauthors of matters arising and to ensure such matters are dealt with promptly. The name and e-mail address of this author is published in the paper.

### Publishers' Responsibilities

- IJIP is committed to work with journal editors, defining clearly their relevant roles, in order to ensure appropriate decisions regarding publication procedures and maintaining the transparency of editorial decisions.
- IJIP ensures the integrity autonomy and originality of each published article with respect to:
  - publication and research fundings
  - publication ethics and rectitude
  - conflicts of interest
  - confidentiality
  - authorship
  - article modifications
  - timely publication of content.
